srnd | CodeDay

# High-energy CS education events reaching driven, diverse students at a global scale.

CodeDay is a worldwide event where student programmers, artists, musicians, actors, and everyone else get together and build apps & games for 24 hours. Students of all skill levels are welcome.

SRND, the non-profit behind CodeDay, started the event in 2011. Since then, we have run more than 300 CodeDays for over 30,000 students.

CodeDay focuses on attracting non-traditional CS students. Combined with our scale, this provides our sponsors with access to an audience not available with other events.

**The events in a nutshell:**

- **What:** A recurring 24-hour programming marathon ("hackathon").
- **Who:** High school through college students.
- **When:** November, February, and April/May.
- **Where:** Over 45 cities nationwide.
- **Size:** 100-500 students/city, 3,000-5,000/season, ~10,000/year.
- **History:** 300+ events and 30,000+ students since 2011.

**Selected current and previous partners:**

amazon alexa · SAP · State Farm · Qualcomm · amazon web services · T-Mobile · namecheap · LexisNexis Risk Solutions

## Case Study: splunk>

Splunk was seeking to increase the number of students graduating with knowledge of their platform. We worked together to create CodeCup: a one-hour, Splunk-based cyber security competition that pits each CodeDay event against each other.

More than half of attendees at every CodeDay participate in CodeCup, and nearly 10,000 students competed in the challenge from 2017-2018.

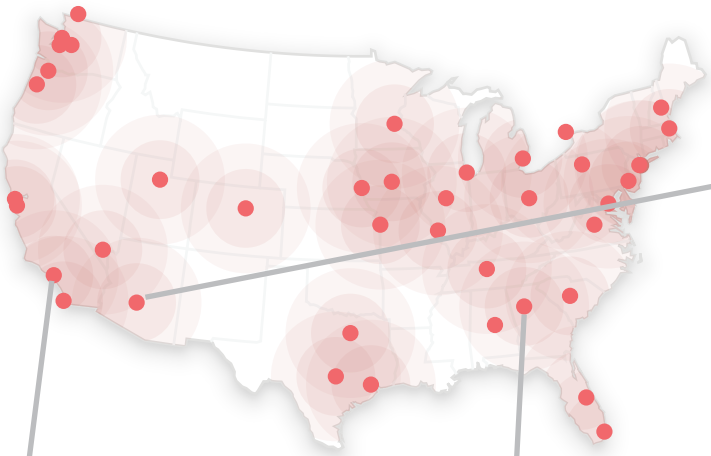
# A unique demographic at global scale.

With established programs in more than 45 cities, and a diverse group of attendees, our sponsors have access to a unique market they can't reach elsewhere.

## Our events occur in most major North American cities, and attract local students, parents, government, and other influencers.



*CodeDay is doing such a great job of trying to make this type of education accessible to everyone.*
