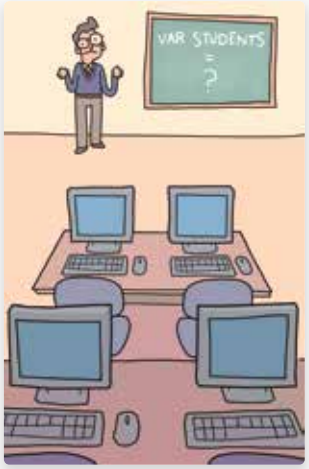
srnd®

Increasing diverse CS enrollment worldwide.

20,000 students in the US, Canada, and Mexico started pursuing Computer Science after attending our programs.



Currently, few low-income and underrepresented students are interested in CS classes.

Our programs help students explore coding, even students who never thought they'd want to code.

Students leave excited and enroll in CS classes and join CS clubs.

Our events work with schools to transform disinterested students into leading CS workers.

CodeDays® drive new students to enroll in CS.

CS Fairs let classes explore new tech and CS careers.

CodeLabs is a summer internship at a global scale.

Since 2011, tens of thousands of students with no CS interest attended events in 50+ cities. Most kept coding.

20,000 diverse students...

69% of students are female, low-income, or Black/Latinx

... have started and stayed coding...

66% of students with no prior interest keep coding

... and began thousands of careers:

We've helped hundreds of schools and districts increase CS enrollment.

[The Salinas Valley] is one of the 13 most dangerous cities in California ... My goal is to expose my students to the vast opportunities that exist outside of our valley.

They were welcomed with open arms ... and began to see themselves as capable of being part of this "world."

Summer Prather-Smith
Director, Monterey County Office of Education
